OUR HISTORY

DEVELOPMENT PROCESS

**2002-
2012**

» Production and improvement of electric hot knives and hot wire for EPS and XPS foam

**2012-
2016**

» Developing cutting tools for rock wool and other insulation materials

**2016-
2019**

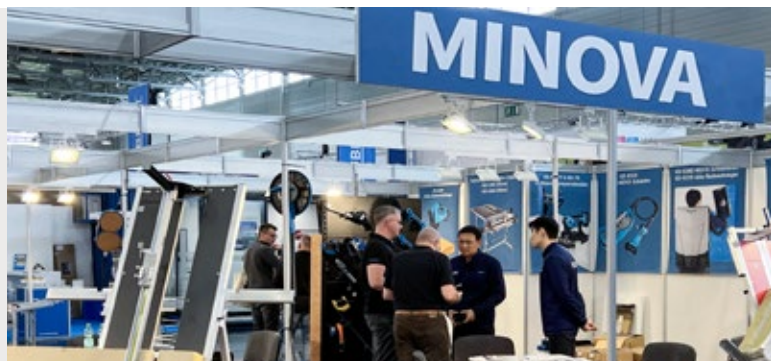

» Professional grinding machines

**2019-
2022**

» Electric rivet tools for industrial use

**2022-
2023**

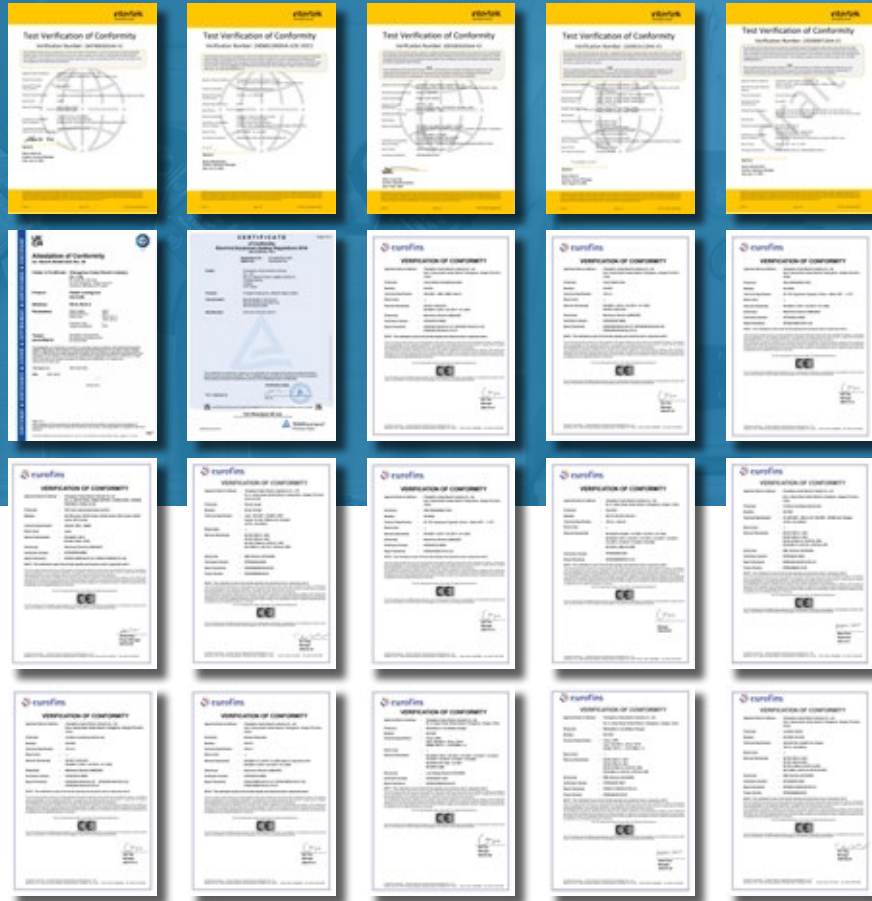

» MINOVA trademark has been registered in mainstream countries and patents have been registered for self-developed products to accelerate the development of the brand in the global market.

2023-

» In 2023, we established MINOVATOOL GmbH, an overseas branch operation in Germany with cooperative overseas warehouse.

VISION - MISSION - VALUE

 **VISION**

Become a world-renowned hardware tool brand company.

 **MISSION**

Become the global leader in the EIFS industry.

 **VALUE**

Quality, seriousness, passion, innovation, and the pursuit of excellence.

Strategic Positioning: Canty Electric is dedicated to provide reliable hardware tool products for global researchers and developers of electronic appliances, hardware and building materials, as well as DIY enthusiasts. Canty Electric prioritizes talent development, provides satisfactory products and services to customers, and allows every user around the world to enjoy the comfortable life experience brought by technological progress.

Business/Product/Service Positioning: Intellectual Property Protection + Market Research + Product Development.

14

KD-7D

ROTATABLE CORDLESS HOT KNIFE FOAM CUTTER

The MINOVA Rotatable Cordless Hot Knife Foam Cutter with Air-Cooling is ideal for cutting expanded polystyrene (EPS) and extruded polystyrene (XPS), KT board, EPE foam, etc.

A unique rotatable function (90°) and the air-cooling system, both make almost any usage scenarios imaginable.

MINOVA

15

KD-E10F

HOT WIRE FOAM CUTTER

The KD-E10F Hot Wire Foam Cutter is a professional machine, ideal for fast and accurate cuts in EPS/XPS foam materials.

Made of plywood, this hot wire foam cutter is very durable and hard-wearing.

Either on the ground or high up on the scaffolding, the Hot Wire Foam Cutter can be set-up almost anywhere, close to where required.

Efficient tool-free changing of the hot wire.

MINOVA

KD-NF Series

5 AXIS CNC HOT WIRE MACHINE

Cutting of EPS, XPS and EPP.

It will work on any Windows PC with network connection.

High Performance, sturdy steel frame and aluminum table targets the commercial production.

For the simultaneous cutting with multi cutting wires.

Handheld Controller and Computer Control are available.

MINOVA

KD-5520

INSULATION MATERIAL WIRE-SAW

Professional wire-saw cutter for almost all insulation boards: mineral wool (glass- and stone wool), foam glass, PIR, PUR, insulating-sandwich boards, Foamed Rubber, etc. and versatile angle settings.

High-quality wire-saw (0.75mm) for precise cuts and minimum sawdust.

The cordless design makes it mobile, without the limitation of a power cord.

MINOVA

KD-5320

CORDLESS BRUSHLESS SANDER

Pure freedom of movement - without power cord.
Brushless motor for extended run time and durability.
Smooth operation, thanks to contra-rotating tool discs.
Electronic - soft start, restart protection and electronic overload protection.
Grinding up to 90m² without recharging (18V/5.0Ah Li-Ion battery).

MINOVA

KD-02X+

CORDLESS BRUSHLESS RIVET TOOL

Faster 50% than other cordless rivet tools
Brushless motor promotes long motor life.
Suitable for all materials blind rivet including aluminum steel and stainless steel ect.
If specially riveting 6.4mm structural rivets such as Heim-lok or 6.4mm stainless steel rivets should be matched with 18V / 4.0Ah Battery.

MINOVA

20

KD-SP06

PEX EXPANSION TOOL

Professional Cordless PEX Expansion tool for expanding 16mm-40mm (3/8"~1-1/2") PEX pipe.

Auto-rotating head achieves even expansion surfaces.

Brushless motor enables extra long working time.

Ergonomically designed body with upper and lower grip locations to optimize pipe expansions in overhead and body-height positions.

Right angle design for use in tight spaces with a secondary lower grip allowing for greater overhead reach.

Onboard LED illuminates the work area and turns off after 5 seconds.

Compatible with Milwaukee and DEWALT expansion heads.

The hook mounted on the side can store tools, and the shoulder strap can also be worn for more convenient work.
